ECOPLUS PLASTIC BRACKET SERIES

Without Pump	3-04-ES5	
---------------------	-----------------	--

With Pump	3-04-ES5 P	
------------------	-------------------	--

Models

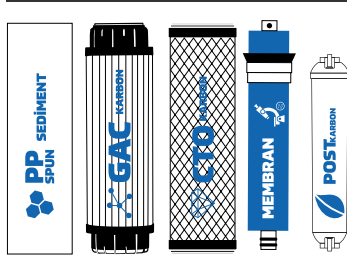

*This model is standard, It is produced with plastic bracket and local housing.

ECOPLUS METAL BRACKET SERIES

Without Pump	3-04-EP5	
---------------------	-----------------	--

With Pump	3-04-EP5 P	
------------------	-------------------	--

Models

*This model is standard, It is produced with metal bracket and taiwan housing.

Specifications

- 1. Stage** 10" PP 5.mic Filter
- 2. Stage** 10" UDF Carbon Filter
- 3. Stage** 10" CTO Carbon Filter
- 4. Stage** 75 GPD Membrane
- 5. Stage** 2" Inline Post Carbon Filter

- Faucet** Lux Faucet
- Pump** 75 Gpd, High Efficient, Quiet
- Tank** 12 Lt. Metal Tank (3.2 G)
- Specifications** Quick Connection, 3/8" Connection With Shut-off Valve

Optional

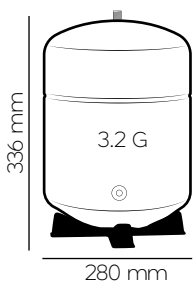

- Add Stage Alkaline Filter
- Add Stage Mineral Filter
- Add Stage BioCeramic Filter

Technical Specifications

Model	Box Size mm	Weight kg

6-5-006	FX-H Filter Head		

1 PP Filter

It extends their life by keeping all the particles and sediments in the water and protecting the subsequent filters.

2 CTO Block Carbon Filter With Silver Ion

It plays an antibacterial role by releasing silver ions into the filtration area. In this way, the formation of a biofilm layer is prevented and hygienic water quality is ensured. At the same time, chlorine, heavy metals and particles in the water are also retained.

3 Silifoz

Silifose (Polyphosphate) Crystals prevent the adhesion and accumulation of lime (hardening Ca. and Mg ions) and carbonates in the water on the surfaces.

4 UF Membrane

Ultrafiltration systems provides removal of turbidity, bacteria, colloid, silt, virus and organic materials of water by means of membranes which has 0,02 micron pores without any requirement for chemical materials.

FOOD - DRINKING WATER, ICE MACHINES, BEVERAGE MACHINES, COFFEE MACHINES, HOT WATER DISPENSERS

Active Carbon Filtration

It removes odor, turbidity, heavy metals. It regulates the taste of water.

Fine Filtration

It traps smaller particles.

Hardness Control

The water hardness is adjusted with the by-pass valve. It minimizes the pH drop. Prevents corrosion.

Pre-filtration

Holds coarse particles.
